You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Kind of product:

This fund complies with Directive 2009/65/EC (UCITS). It is an actively managed fund. This means that the management company, based on its analysis, adjusts the composition of the investment portfolio with the aim of maximizing profitability, trying to obtain a higher return than the market.

The investment decision-making process takes sustainability risks into account in the analysis; however, it does not promote environmental or social characteristics and does not have sustainable investment as its objective. The Sub-Fund is classified as an "Article 6" financial product in accordance with Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector.

In the following link you can find more information about the fund in Spanish and English for free (Brochure, Annual Report, Prices, etc.):

<https://www.buyandhold.es/estrategias-inversion/estrategia-inversion-bonos/bh-high-yield-lu/>

The depository of this fund is Cecabank S.A. Branch in Luxembourg

Term:

The Product has been established for an indefinite duration. The Sub-fund offers daily redemption facilities under normal market conditions. Under certain market conditions, the Sub-fund may not be able to meet redemption requests. The Manufacturer may terminate the Product early. The amount you receive in the event of early termination may be less than the amount you invested.

Investment Objectives:

The investment objective of Buy & Hold Luxembourg – B&H High Yield (the "Sub-Fund") is to achieve medium- to long-term capital appreciation by obtaining predominantly global exposure to high-yield fixed-income instruments, while maintaining an active, dynamic and flexible management of the level of risk assumed in response to conditions in the international financial markets.

Management takes as reference the performance of the Euro HY Corp 5-7 Years, for informational purposes only.

Investment Policy:

- The investment objective of the Sub-Fund is to achieve medium to long-term capital appreciation by seeking exposure to a broad range of asset classes on a global scale to high-yield fixed-income instruments, while gaining dynamic and flexible exposure to risk according to the situation of global markets.
- The Sub-Fund is a multi-asset, medium to long-term, total return instrument that aims to explore the opportunities offered by the financial markets, investing in variable proportions across different asset classes (i.e., equities versus bonds), instruments (Target Funds versus Direct Investments), regions and sectors. To achieve the Sub-Fund's investment objective, the Management Company may temporarily and tactically overweight a specific asset class, instrument, country or sector, always in accordance with the investment limits described in the offering document.
- The objective of the Sub-Fund is to achieve returns on its investments, while reducing volatility, within defined investment limits, in response to dynamic economic conditions that could affect the performance of the relevant asset classes.
- Hedging strategies are used to try to limit exposure to currency movements between the Reference Currency of the Sub-Fund and the currencies of the investments. It cannot be guaranteed that this coverage will be successful.
- The Sub-Fund is exposed to leverage and therefore the value of units may rise or fall more rapidly than if there was no leverage.
- The shareholder may redeem their shares on a daily basis. The Management Company does not allow practices related to Market Timing, that is to say, that an investor subscribes and redeems systematically, within a short period of time, taking advantage of temporary differences and/or imperfections or deficiencies in the method of determining the Net Asset Value.
- This fund is for accumulation, that is, the returns obtained are reinvested.

Retail investor to whom it is addressed:

- Any person of legal age, resident in Spain, Italy and Portugal.
- It is aimed at investors with a high risk tolerance and a medium- to long-term investment horizon who wish to invest in a global and diversified portfolio of high-yield fixed-income instruments. Investors should be able to bear losses in line with the risks of the fund, have an investment horizon aligned with that of the fund, and possess sufficient prior investment experience and financial knowledge.
- This Product has no minimum recommended holding period, but it is designed for long-term investment. Therefore, you should be prepared to hold your investment in the Product for at least 4 years.

What risks am I running and what could I get in return?

Risk indicator

The risk indicator assumes that you will keep the product for 4 years. The actual risk can vary considerably in case of early exit, so you may recover less money.

The summary risk indicator is a guide to the level of risk of this product compared to other products. Shows how likely the product is to lose money due to changing markets or because we can't pay you.

We have classified this product in the risk class [3] on a scale of 7, in which 3 means «medium low risk».

This evaluation qualifies the possibility of suffering losses in future profitability as «middle-low» and the probability that a bad market situation will affect the ability to pay you as a «unlikely».

The risks to which the policyholder is exposed are interest rate and credit, that is, the underlying investments of the product may be affected in their valuation by variations in the interest rate and movements in the risk premium of the issuers of the assets. in portfolio.

This product does not include any protection against future market developments, so you could lose part or all of your investment.

The product may have exposure to currency risk.

Investing in low-credit-quality fixed income or small-cap equities may adversely affect the liquidity of the fund.

This summary risk indicator does not take into account the eventual sustainability risk of the product.

Profitability scenarios

What you get from this product will depend on future market developments, which are uncertain and cannot be accurately predicted.

The unfavorable, moderate, and favorable scenarios shown are illustrations based on the lowest, average, and highest profitability of the product over the past 10 years. Markets could evolve very differently in the future.

Recommended maintenance period:	4 years		
Investment:	€10.000	Leave after 1 year	Leave after 4 years

Scenarios

Minimum: **There is no guaranteed minimum return. You could lose part or all of your investment.**

Stress	What you could receive after costs	€6.940	€7.280
	Average yield each year	-30,55%	-7,62%
Unfavorable	What you could receive after costs	€7.880	€7.870
	Average yield each year	-21,18%	-5,82%
Moderate	What you could receive after costs	€10.500	€10.810
	Average yield each year	4,96%	1,96%
Favorable	What you could receive after costs	€12.260	€12.190
	Average yield each year	22,61%	5,07%

The figures presented include all the costs of the product itself, but may not include all the costs that you may have to pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also influence the amount you receive.

The stress scenario shows what you could receive in extreme market circumstances.

The return to the holding period in the unfavorable scenario occurred in the period: 31/08/2021 - 30/09/2022 from the benchmark composed of: Euro HY Corp 5-7 Years. The return to the holding period in the moderate scenario occurred in the period: 26/02/2021 - 28/02/2025 from the benchmark composed of: Euro HY Corp 5-7 Years. The profitability to the maintenance period in the favorable scenario occurred in the period: 31/03/2020 - 29/03/2024 from the benchmark composed of: Euro HY Corp 5-7 Years.

What happens if Buy & Hold, S.G.I.I.C. can not pay?

As it is a collective investment institution, the insolvency situation of Buy & Hold SGIIC would not affect the assets invested in the product. The performance of the underlying assets in which the IIC invests are those that will determine the possibility of non-payment of the investment. There is no compensation or guarantee regime that protects the retail investor.

What are the costs?

Costs over time

The tables show the amounts that are taken out of your investment to cover different types of costs. These amounts depend on how much you invest and how long you have the product. The amounts shown are illustrations based on an example investment amount and different possible investment periods. We have assumed:

In the first year you would get back the amount you invested (0% annual return). For the other holding periods, we have assumed that the product behaves as shown in the moderate scenario.

10,000 EUR are invested.

Investment term	Leave after 1 year	Leave after 4 years
Total Costs	95 €	399 €
Annual cost impact (*)	1,0%	1,0%

(*)Reflects the extent to which costs reduce their performance each year throughout the maintenance period. For example, it shows that if you exit at the end of the recommended holding period, the average return you are expected to earn each year will be 2,91% before deducting the costs and the 1,96% after deducting costs.

Composition of costs		
		Annual incidence of costs in case of after 1 year
One-time costs at entry or exit		
Entry costs	There is no entry fee for this product.	0 €
Exit costs	There is no exit fee for this product.	0 €
